CONNECTING YOU WITH COMPETITIVE RATES OF RETURN AND FLEXIBLE ACCESS TO YOUR MONEY

Whether you need immediate access to your money or are happy to leave it to grow, we can connect you to a range of short-, medium-, and long-term options to meet different savings and investment objectives. These include different rates of return, liquidity, underlying investment exposure and levels of capital protection.

SHORT-, MEDIUM-, AND LONG-TERM SAVINGS AND INVESTMENT OPTIONS

Many options provide capital protection and a preferential interest rate if you invest online or through our app. Please refer to the comparative table on page 2 to decide which one may be best for you.

	1 When you need access to your money.	2 The rate of return you wish to earn on your money.
What is important to you?	Knowing that you can access your money immediately or within a specific timeframe.	This is generally related to how long you can leave your money with us and/or how much you invest.
Ways to achieve this	Some bank savings options are more flexible in terms of: <ul style="list-style-type: none"> giving you access to your money when you need it; allowing you to make withdrawals; and enabling you to add to your initial investment. 	There is a range of rates of return. These may be: <ul style="list-style-type: none"> linked to the prime interest rate or the money market fund rate; tiered based on your balance; or varied based on your investment and how long you choose to invest.
Potential returns and risks	<ul style="list-style-type: none"> The less flexible options compensate you with a higher rate of return. Most of the bank savings options provide guaranteed capital protection. 	

WE ALSO OFFER A RANGE OF OPTIONS THAT PROVIDE ACCESS TO LOCAL AND INTERNATIONAL MARKETS

A diversified range of longer-term investment options, providing market-related capital growth, income or a combination of the two.

We offer a range of local and international investment options that include:

- unit trusts, and
- dividend-yielding investments.

Please speak to your relationship manager about these options.

We can connect you to the most suitable option for your needs.

Each of the investment options have different:

- minimums, objectives, timeframes for investing, withdrawal limits, and other features and benefits; and
- exposure to underlying market investments and instruments to achieve a desired risk/return profile.

Market-linked underlying investments do not provide capital protection unless this is explicitly guaranteed by the product terms.

CONNECTING YOU TO A RANGE OF OPTIONS WITH PREFERENTIAL RATES WHEN YOU INVEST VIA THE APP

WHAT TO CONSIDER:

- How much you wish to invest.
- How long you can remain invested and if you think you may need to access some or all of your money, and when.
- Whether you want to be able to add to your initial investment.
- Whether capital protection is relatively more important to you than capital growth and/or income.

If you are not sure what is right for you, your relationship manager can help you translate your needs and goals into a solution that will provide an optimal outcome and ensure that your portfolio remains diversified to reduce risk.
